EXPERIENCE

AUG 2021 - NOV 2023

ASSOCIATE SOFTWARE ENGINEER
Makinus. Melapalayam,Tinunelveli,Tamilnadu

- Answered calls, responded to emails, and spoke with clients.
- Proactively participated in meetings and helped create new practices.
- Proficient in server-side logic, data persistence, and RESTful API development using .Net framework.
- Optimized database queries through indexing, query tuning, and stored procedures in SQL Server environment.
- Performed code reviews to ensure that all codes adhere to best practices and standards set by the organization.
- Resolved production support incidents quickly while maintaining service level agreements.
- Understood technical problems and solutions in relation to current and business environments.
- Developed SQL queries to analyze data from multiple sources for reporting purposes.
- Worked with React to build responsive and dynamic user interfaces, implementing state management and integrating with RESTful APIs for seamless front-end and back-end communication.

NOV 2023 - PRESENT

WEB DEVELOPER
SoftInnovation. i-TECH TOWER SHAFTSBURY 63000, Sdn Bhd   Cyberjaya, 63000 Cyberjaya, Selangor

- .NET framework, JavaScript, and jQuery, along with strong proficiency in SQL operations and logical problem-solving. Seeking a challenging position where I can leverage my technical expertise in both front-end and back-end development, including server-side logic, data persistence, RESTful API development, and database optimization. Dedicated to maintaining high standards of code quality and committed to continuous improvement through proactive participation in team activities and adherence to best practices.

EDUCATION

2018 - 2021

BECHELOR OF SCIENCE
Sadakathullah appa college. Tinunelveli,Tamilnadu

PROJECTS

Chaikings POS

Project Description : A Point of Sale (POS) application is user-friendly software designed to streamline payment processing and inventory management. This secure application handles various payment methods, monitors stock levels through barcode scanning, and automates reordering processes to prevent stock shortages. The system offers real-time sales data and reports, empowering businesses to make informed decisions and optimize their operations.

Some POS applications even incorporate Customer Relationship Management (CRM) features to store customer information. Ultimately, a POS application enhances customer service by improving transactions, providing accurate product information, and efficiently managing loyalty programs.

Roles and Responsibilities:

- Code Documentation: Comprehensive documentation for smooth collaboration and future maintenance.
- Optimization: Improving performance and user experience through efficient coding practices.
- Collaboration: Working closely with cross-functional teams for a cohesive application.
- Adherence to Standards: Ensuring compliance with industry standards and security protocols.
- Communicate with the client weekly in a one-time meeting to discuss overall project improvement.
- Problem Solving: Identifying challenges and providing effective solutions.
- Continuous Learning: Staying updated for innovative contributions to the project.

Technology Stack:

Frontend : Knockout.js, HTML5, CSS3, JavaScript and jQuery

Backend : PHP

Database : Mysql

Integration : Onextel SMS, Pinelaps pos payment , Urban piper and Jasper server

Ecommerce

Project Description: This project involves developing an Ecommerce Admin and User Backend API using Dotnet framework. The API serves as the backend infrastructure for an online ecommerce platform, providing distinct functionalities for administrators and users. The Admin API facilitates product, order, inventory, and user management for administrators, while the User API enables users to browse products, manage carts, place orders, and make secure payments. The API ensures efficient operations for administrators and enhances the user experience for customers.

Roles and responsibilities:

- Overall responsibility for project planning, execution, and successful delivery.
- Define project scope, goals, and milestones.
- Coordinate and communicate with team members.
- Manage risks, issues, and changes throughout the project lifecycle.
- Make architectural decisions and design choices.
- Coordinate with team members to assign tasks and ensure consistent coding practices.
- Review code to ensure quality, adherence to coding standards, and proper documentation.
- Provide guidance and mentorship to junior developers.
- Design and maintain the database schema.
- Create database tables, indexes, and relationships.
- Write SQL queries, stored procedures, and database scripts.

Technology Stack:

Frontend : React

Backend : Dotnet Core and Microsoft sql server 2019

HRMS

Project Description : Human resource management system(HRMS) is a complete suite of various services catered to employee management portfolios. It has master modules to set up all the necessary details for any organization. Employee management, Taxation, Leave management, Configuration settings are very key modules to any human resource service. It provides lots of reports that help to print payslips, offer letters, appointment orders, and bonafide certificates using Crystal Report.

Roles and Responsibilities:

- To design a database system based on the end user's requirements.
- To design and develop database schema and ensure their stability, reliability, and performance.
- Write clean, scalable code using .NET programming languages
- Involved in all phases of software development life cycle including requirements, design, development, testing, deployment and support
- Responsible for code optimizing and tested across browsers

Technology Stack:

Frontend : Knockout.js, HTML5, CSS3, JavaScript and jQuery

Backend : SQL Server 2019, C#, .Net Core
